

Technip awarded EPCI contract at Campos Basin offshore Rio de Janeiro

October 19, 2005

Paris, October 19, 2005

Technip has been awarded by Petroleo Brasileiro S.A. (Petrobras) an EPCI⁽¹⁾ contract valued around US\$ 210 million for a subsea pipeline and a free standing hybrid riser⁽²⁾ (FSHR) for deep water oil export in the Campos Basin, offshore Rio de Janeiro.

The contract includes the engineering, procurement, manufacturing, installation and pre-commissioning of the oil export system from semi-submersible platform P-52 to PRA-01, a shallow water collection platform, as well as a free standing hybrid riser⁽²⁾ (FSHR) in 1,800 meters water depth.

Installation of the 56 km-long thermally insulated 18" rigid line and the riser, to be carried out by Technip's deepwater pipelay vessel Deep Blue, is slated for the first quarter of 2007. These operations will be carried out using the J-Lay deployment method in water depths ranging from 100 m to 1,800 m.

Technip's engineering center in Rio de Janeiro (Brazil) will be responsible for the overall project management with the technical support from Technip Offshore UK and Technip USA.

This contract falls within the framework of Campos Basin Oil Outflow and Treatment Plan (PDET), which aims to increase oil flow capacity in Campos Basin by as much as 630,000 barrels per day.

(1) EPCI: Engineering, Procurement, Construction, Installation.

(2) Riser: vertical flexible pipe connecting the subsea pipelines to the surface facility.

With a workforce of about 20,000 persons, Technip ranks among the top five corporations in the field of oil, gas and petrochemical engineering, construction and services. Headquartered in Paris, the Group is listed in New York and Paris. The Group's main engineering and business centers are located in France, Italy, Germany, the UK, Norway, Finland, the Netherlands, the United States, Brazil, Abu-Dhabi, China, India, Malaysia and Australia. In support of its activities, the Group manufactures flexible pipes and umbilicals, and builds offshore platforms in its manufacturing plants and fabrication yards in France, Brazil, the UK, the USA, Finland and Angola, and has a fleet of specialized vessels for pipeline installation and sub sea construction.

Cautionary note regarding forward-looking statements

This release contains both historical and forward-looking statements. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements, or statements of future expectations; within the meaning of Section 27A of the Securities Act of 1933 or Section 21E of the Securities Exchange Act of 1934, each as amended. These forward-looking statements are not based on historical facts, but rather reflect our current expectations concerning future results and events and generally may be identified by the use of forward-looking words such as "believe", "aim", "expect", "anticipate", "intend", "foresee", "likely", "should", "planned", "may", "estimates", "potential" or other similar words. Similarly, statements that describe our objectives, plans or goals are or may be forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to differ materially

from the anticipated results, performance or achievements expressed or implied by these forward-looking statements. Risks that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among other things: our ability to successfully continue to originate and execute large integrated services contracts, and construction and project risks generally; the level of production-related capital expenditure in the oil and gas industry as well as other industries; currency fluctuations; interest rate fluctuations; raw material, especially steel, price fluctuations; the timing of development of energy resources; armed conflict or political instability in the Arabic-Persian Gulf, Africa or other regions; the strength of competition; control of costs and expenses; the reduced availability of government-sponsored export financing; the timing and success of anticipated integration synergies; and the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements as from January 1, 2005.

Some of these risk factors are set forth and discussed in more detail in our Annual Report on Form 20-F as filed with the SEC on June 29, 2004, and as updated from time to time in our SEC filings. Should one of these known or unknown risks materialize, or should our underlying assumptions prove incorrect, our future results could be adversely affected, causing these results to differ materially from those expressed in our forward-looking statements. These factors are not necessarily all of the important factors that could cause our actual results to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors also could have material adverse effects on our future results. The forward-looking statements included in this release are made only as of the date of this release. We cannot assure you that projected results or events will be achieved. We do not intend, and do not assume any obligation to update any industry information or forward looking information set forth in this release to reflect subsequent events or circumstances. Except as otherwise indicated, the financial information contained in this document has been prepared in accordance with IFRS, and certain elements would differ materially upon reconciliation to US GAAP.
