

COFLEXIP, AN ENGINEERED SOLUTION

When you decide to go "COFLEXIP" you choose not only the best product, but also the company which will give you with the flexible the most experienced support system available, gained from designing and installing thousands of such systems throughout the world, so that you obtain the best and longest possible trouble-free service. When quoting, we ensure that we have all the necessary technical data available to guarantee the precise matching of our product

to your needs, and if these elements are not readily available, or unreliable (in the case of old storage tanks for example), a fully trained technician will make an on-site visit to gather all the necessary information. This technician can also verify the installed product prior to commissioning, providing you with yet more confidence in its correct functioning for years to come, for your benefit and guarantee of perfect service of our system.

"The best service for the best product"

A USER'S GUIDE is also available which provides detailed information for safe set up by Client's installation team.
